NAVIGATION

Depth sounder	Yes, Nasa Marina Target-2	GPS	Yes, Humminbird Helix 5
VHF Radio	Yes, not connected! Icom IC-M330	Radar	No

Aquanaut Beauty 1050 AK "Djindra"

A very neat and well maintained Aquanaut Beauty 1050 AK, originally built as an exhibition ship and completely repainted in 2024. This ship combines solid built quality with a practical layout, making it ideal for trips on inland waterways and comfortable weekend use.

In the bow there is an open cabin with a V-bed, galley and dinette. The galley is equipped with a spacious worktop, a 3-burner gas stove, a sink and a fridge with freezer compartment. Opposite the galley is the dinette; This seating area can easily be converted into an extra sleeping place, which is handy for visitors or for (grand) children.

In the saloon you will find the inside steering position with clear instruments and controls. The L-shaped bench offers comfortable seating and extra storage space in the spaces below. A practical side door gives direct access to the gangway, which facilitates mooring and unmooring and increases contact with the outdoors.

In the stern a spacious owner's cabin with a freestanding bed, making it comfortable to get in and out and extra storage space under the bed. The bathroom is equipped with a toilet and sink and is spacious and functional. Through the rear exit you step directly onto the spacious aft deck. The aft deck is equipped with a sprayhood and bimini, giving you both shelter from rain and sun. The stainless steel railing all around ensures safety on the deck. The tinted glass is applied with foil, which provides privacy and sun protection without compromising the view.

The Aquanaut is equipped with a reliable 75 hp Yanmar engine. This engine provides enough power for relaxed touring on inland waterways such as lakes, canals and rivers. For extra convenience when mooring and tight manoeuvring, the ship has an electric bow and stern thruster. This makes mooring in narrow ports or in headwinds considerably easier. A large solar panel is mounted on the cabin roof that contributes to charging the batteries and maintaining the on-board voltage.
