Aquanaut Drifter 1150 "Special," one of the most complete Aquanaut Drifter 1150 AK built.

The Aquanaut Drifter 1150 Special is an well maintained and very fully equipped motor yacht. This is even one of the most fully equipped Drifter 1150's that Aquanaut has ever built. Thanks to the flat-cooled engines, this ship is excellent for comfortable sailing throughout the year. Not only the engines, but also the generator is equipped with flat cooling. In addition, the propeller shafts are lubricated with grease lubrication, so that the ship can be used in all seasons without any problems as long as there is no ice formation.

The ship is also equipped with recently installed TopWindows double-glazed windows and portholes, 14 mm Tarec insulation behind the paneling and a Kabola central heating system. For extra comfort during hot summer days, air conditioning is also available on board.

The warm and attractive interior is finished with teak. The saloon sofas and curtains were renewed in 2023 and upholstered with a beautiful fabric. There is no gas installation on board; Cooking is done safely and comfortably on a 2-burner electric stove and a 2-burner diesel stove. The ship has a boiler for hot water.

The 230V power supply is excellently provided with a shore power connection, a powerful 5000 Watt inverter (2026), two lithium batteries of 300 Ah each (2026) and a Mastervolt Whisper 6000 generator. This means that you are completely independent even for longer stays on board.

In the front of the ship is the guest cabin with a comfortable V-bed. In addition, you will find a spacious dinette and a practical galley, equipped with a worktop, cooking appliances, sink, microwave and a fridge with freezer compartment.

The saloon offers a spacious bench with table, a cupboard wall and a clear inside steering position. In the stern, the Aquanaut has a separate shower facility, a separate toilet room with electric toilet and a spacious owner's cabin with a freestanding double bed. A washer/dryer combination is also neatly concealed in a cupboard.

The "Arend" is a comfortable and easy to maneuver CE-B certified multi-articulated motor yacht. Thanks to the two engines and the powerful hydraulic bow and stern thruster, the ship can be maneuvered and moored effortlessly under almost all conditions. When the hydraulically lowerable mast, the sprayhood, the bimini and the windshield are folded down, the vertical clearance is less than 2.50 meters! This makes a large sailing area accessible and the French inland waterways route is also an attractive option.
